

ROBOTS BY VALIANT TECHNOLOGY

**THE VALIANT TURTLE**

**THE CLASSIC ROAMER**

**ROAMER**

## Innovative Evidence-Based Education

Valiant Technology Ltd is an Anglo-American company founded in 1985 by Professor Tom Stonier from New York and British engineer, Dave Catlin. Their aim was to develop innovative educational products based on a mixture of theory, educational research and good, practical teaching practice. Valiant's first product was the Valiant Turtle, a LOGO-type Turtle which led to the development of the Roamer® robot product range.

CEO and product designer Dave is a leading researcher in educational robotics and believes that, "It is essential to develop products for schools in partnership with teachers and students". Consequently, while Valiant is a small company, it has networks across the world and Roamer® is sold into 27 different countries.
